DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patrick S. Yoda on 2/1/2006.

The application has been amended as follows:

IN THE CLAIMS:

Claim 18, line 4, after "of" insert --uncompressed-- and before "to lossless" insert --representative of individual picture elements--.

Claim 24:

Line 1, after "computer", insert --readable medium storing a computer--

Delete entire line 3;

Line 6, before "the", insert --uncompressed image data representative of individual picture elements in--.

Response to Arguments

2. Applicant's arguments, see Appeal Brief (see Sections B and C, pages 8-13) filed 11/14/2005, with respect to claims 1-27 have been fully considered and are persuasive. The rejection of claims 1-27 has been withdrawn.

Allowable Subject Matter

3. Claims 1-27 are allowed.
4. The following is an examiner's statement of reasons for allowance:
- * The Appeal Conference conducted on 2/1/2006 found the allowability of some claims and suggested to resolve the remaining problem with other claims;
 - * A telephone interview conducted in the same day to get an authorization from the Applicant's Representative to amend claims 18 and 24 in order to place the application in allowance condition;
 - * The above Examiner's Amendment to claims 18 and 24 makes these claims allowable and overcome possible problem with 101 issues;
 - * The present invention provides a new method, system, and computer readable medium for compressing image data, which obtains higher relative compression ratios in a computationally efficient manner (see specification, page 2, line 20-24).

Particularly, the new method, system, and computer readable medium comprise the following features, which the prior art taken either singly or in combination does not teach:

Art Unit: 2627

- compiling and storing a plurality of compression mapping tables for converting uncompressed data representative of individual picture elements to lossless compressed data (see independent claim 1);

- defining a family of compression code tables for converting uncompressed image data to lossless compressed data; storing the compression code tables in an image data compression station and in an image data decompression (see independent claim 12);

- a data compression station configured to store a plurality of compression code tables for conversion of uncompressed image data representative of individual picture elements to lossless compressed image data and to execute a compression routine in which an image data stream is converted to a compression file by dividing into subregions and each subregion compressing in accordance with a compression code table selected from the plurality of compression code tables based upon which compression code table provides optimal lossless compression of the subregions (see independent claim 18);

- configuration code and a plurality of compression code tables stored on the machine readable medium, the configuration code including an algorithm for analyzing an image data stream, for compressing subregions of uncompressed image data representative of individual picture elements in the image data stream by application of a plurality of compression code tables, and for compiling the compressed subregions into a lossless compressed data file (see independent claim 24).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
